Learn More: Mortimer – Pannell 24/25 Rebuild Project

National Grid's Mortimer – Pannell 24/25 Rebuild Project will rebuild approximately 16 miles of aging 115kV electric transmission lines through the towns of Brighton, Henrietta, Fairport, Pittsford, Perinton and the Village of Pittsford in Monroe County, New York.

Once constructed, the newly rebuilt transmission line will provide enhanced electric reliability for the Western New York region.

To further inform you, enclosed with this announcement are copies of some recent notices about this important project.
