Update on work in your community

Augustina Avenue Upgrade Project

Far Rockaway, NY

June 30, 2023

Dear Neighbor,

We are writing to update you regarding ongoing work in your neighborhood. As you may know, we are currently upgrading the existing regulator station, located on Augustina Avenue between Minton Street and Beach 12th Street in Far Rockaway, Queens.

Part of our outstanding work includes mandated quality assurance testing, that is currently scheduled to begin **on or about July 10th**. During this test You may notice noise generated from the associated equipment required to complete this testing, which is part of our integrity management process to ensure safety and compliance with industry and local codes and standards. We expect tests to be complete by the end of that week. This an important step forward towards completing work in your neighborhood.

Once completed, the new QD-11 regulator station will improve safety and reliability of National Grid service throughout your neighborhood. The project remains on schedule for completion in Fall 2023. We thank you for your continued patience as we complete this important infrastructure upgrade. A map of our work and material storage areas is included for your reference below.

As always, our crews will continue to work diligently to minimize any impacts to the community, but if you do have questions or concerns with regard to this project, please contact our Stakeholder Management team directly at (631) 213-2009 or box.LIprojects@nationalgrid.com.

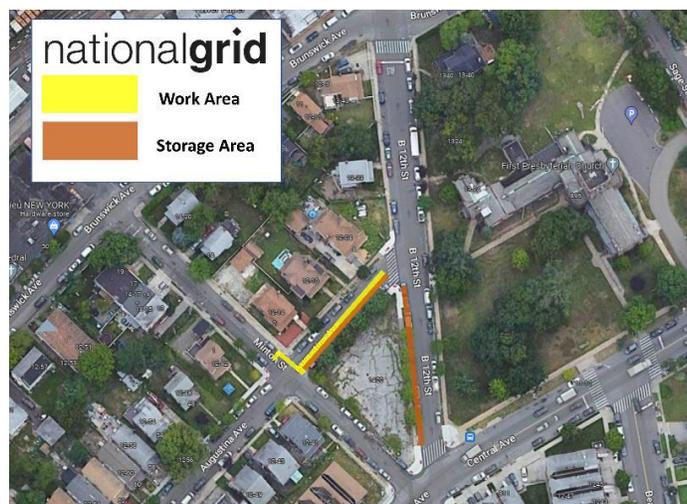

For your safety, please do not enter work zones and be mindful of work zones during and after construction hours. Thank you for your cooperation and understanding as we continue to move towards finalizing this important project.
