

# Construction is starting in your neighborhood.

## Riverhead Facility Upgrade | Riverhead, NY

Dear Neighbor,

We are writing to inform you of upcoming upgrades to our Riverhead facility on Mill Road and Main Street in Riverhead, NY. These upgrades will increase the safety and reliability of service for our customers across Long Island.

We will be upgrading the facility in two phases. Phase one involves demolishing and rebuilding existing structures and installing truck stations. Phase two will focus on upgrading the existing regulator station and rebuilding the maintenance building on Doctors Path. You can expect the most noise impacts within the first four weeks of construction, due to jack hammering and the operation of vacuum trucks. **There will be no interruption to service for National Grid customers.**

**Work hours:** Monday-Friday 7AM to 4PM\*

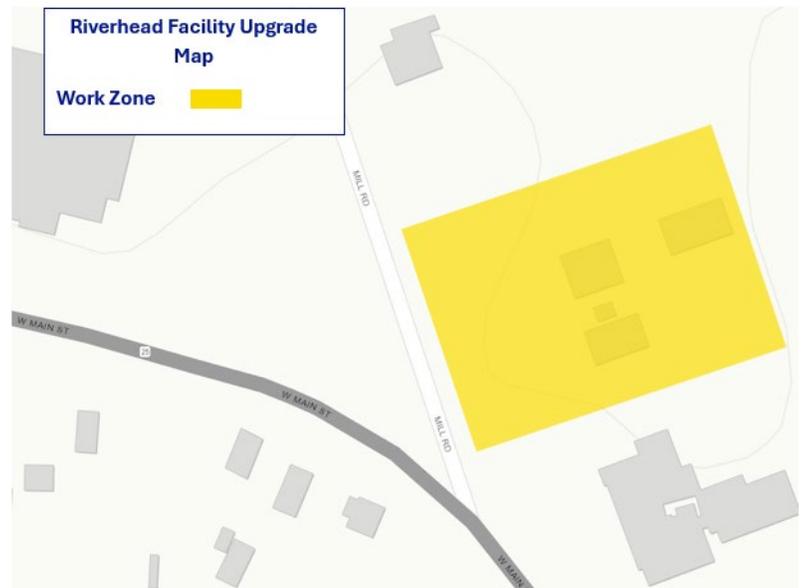

**Timeline:** June 2025 through Summer 2028

### Phase One: June 2025 to Winter 2025

- Demolition of existing foundations and buildings within National Grid property.
- Installing truck stations.

### Phase Two: Spring 2027 to Summer 2028

- Upgrades to existing regulator stations.
- Rebuilding the maintenance building on Doctors Path.

For questions regarding this working, please contact the Project Engagement team at **516-452-3003**, [box.liprjects@nationalgrid.com](mailto:box.liprjects@nationalgrid.com), or visit our project website: [www.ngrid.com/rfu](http://www.ngrid.com/rfu)

*\*Schedule is subject to change due to weather and key project activities.*

Sincerely,

**National Grid**
