

Learn how you can start saving energy and money today.

It all starts with a no-cost Home Energy Assessment.

National Grid is here to help you benefit from a home that's energy efficient, healthier and more comfortable — at no cost to you — whether you're a homeowner, renter, or landlord.

- 1** Schedule a Home Energy Assessment. We will connect you with one of our Energy Specialists who will meet you in person or by phone to assess your home's energy use and provide personalized recommendations.
- 2** Receive no-cost energy-saving products like advanced power strips, low-flow showerheads and programmable thermostats.
- 3** Qualify for up to 100% off approved insulation, no-cost air sealing and rebates toward eligible appliances and equipment.

What is home weatherization and how does it help me?

Weatherization is the process of insulating and air sealing a building to protect it from the outdoors, which can lower energy use, help manage annual heating and cooling costs, and defend against dust and allergens.

See why 99% of participants would recommend a Home Energy Assessment to a friend or family member.
